Measuring for Proper Fit
The following guidelines are important to remember in measuring for proper fit.

1. Give all measurements in inches.

2. If the person’s measurements are between sizes, order the larger size. For example, if a man’s neck measures 15 3/4 inches, you should order size “large” in a short sleeve shirt or a 16-16 1/2 in a long sleeve shirt.

3. For greatest accuracy, have someone else take your measurements rather than measuring yourself.

4. The tape measure should be pulled snug, not tight.

SHIRTS
1. NECK measurement is the circumference of the neck as illustrated.

2. SLEEVE LENGTH is measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the bottom of the wrist. It is often helpful to have the arm slightly bent.

TROUSERS AND JEANS
1. WAIST measurement is taken at the top of the hipbone over shirt (not over pants) at the position pants are normally worn. Hold the tape firmly, not tightly.

2. INSEAM measurement is taken from the base of the crotch to the top of the shoe or boot. If 100% cotton denim jeans are to be ordered, allow for 3% shrinkage.

HINT - Use pants that fit well. Lay them flat with the front and back creases smooth. Measure along the inside seam of one leg from the bottom of the hem to the crotch.
Measuring for Proper Fit
The following guidelines are important to remember in measuring for proper fit.

COVERALLS
1. CHEST SIZE is taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. This measurement should be taken over clothing, preferably over same garment or types of garments to be worn with the coveralls.
2. INSEAM - it is suggested that the coveralls be ordered 2 inches shorter than your usual pant inseam to accommodate Dickies’ lower crotch construction.

OVERALLS
1. WAIST Add 2 inches if you plan to wear pants underneath the overalls. Otherwise, order your normal pant size.
2. INSEAM should be your normal pant inseam.

JACKET
1. CHEST SIZE is taken at the fullest point of the chest, keeping tape under arms and around shoulder blades. This measurement should be taken over clothing, preferably over garments or types of garments to be worn with jacket.
2. SLEEVE LENGTH is measured by placing one end of the tape at the bottom of the collar at the center of the back and marking the distance around the elbow to the outer edge of the wrist.

WOMEN
1. HIP measurement is taken with heels together and around the fullest point.
2. CHEST measurement is taken at the fullest point of the bust and across shoulder blades holding tape firmly (but not tight) and level.

MATERNITY
